

# Compendium of Raspberry and Blackberry Diseases and Insects (The Disease Compendium Series of the American Phytopathological Society)

Also includes diseases of boysenberries, loganberries, tayberries, etc. Table of Contents Introduction; The Genus Rubus; The Raspberry and Blackberry Plants Part 1: Diseases Caused by Biotic Factors; Cane and Foliar Diseases Caused by Fungi; Anthracnose, Cane Blight, Midge Blight, Spur Blight, Cane Botrytis, Purple Blotch, Ascospora Dieback, Botryosphaeria Cane Canker of Blackberry, Rosette (Double Blossom), Downy Mildew, Powdery Mildew, Raspberry Leaf Spot, Septoria Leaf Spot of Blackberry, Sydowiella and Gnomonia Cane Cankers, Nectria Canker of Raspberry, Silver Leaf Fruit and Flower Diseases Caused by Fungi; Botrytis Fruit Rot (Gray Mold) and Blossom Blight, Postharvest Soft Rot (Leak Disease), Minor Fruit Rots, Stamen Blight; Rust Diseases; Orange Rust, Cane and Leaf Rust, Yellow Rust, Late Leaf Rust, Blackberry Rust, Minor Rust Diseases Root and Crown Diseases Caused by Fungi; Phytophthora Root Rot, Verticillium Wilt, Armillaria Root Rot, White Root Rot Diseases Caused by Bacteria; Crown and Cane Gall, Fire Blight, Pseudomonas Blight, Leafy Gall, Hairy Root Diseases Caused by Viruses and Viruslike Agents; Aphid-Transmitted Diseases; Raspberry Mosaic Disease Complex, Raspberry leaf Curl, Cucumber Mosaic, Raspberry Vein Chlorosis Leafhopper-Transmitted Diseases; Rubus Stunt; Nematode-Transmitted Diseases; European Nepovirus Diseases, Tomato Ringspot Pollen-Transmitted Diseases; Raspberry Bushy Dwarf Viral Diseases with Unknown Methods of Natural Spread; Apple Mosaic, Blackberry Calico, Cherry Leaf Roll, Tobacco Streak, Wineberry Latent Virus, Other Viruses and Viruslike Agents Nematode Parasites; Root-Lesion Nematodes, Dagger and Needle Nematodes, Other Nematodes Part 2: Arthropod Pests Insects That Damage Roots and Crowns; Raspberry Crown Borer, Root

Weevils, Strawberry Crown Moth  
Insects That Damage Fruit; Scarab Beetles, Japanese Beetle, Green June Beetle, Rose Chafer, Lygus Bugs, Raspberry Bud Moth, Picnic Beetles, Raspberry Fruitworms, Yellowjackets, Strawberry Bud Weevil (Clipper)  
Insects and Mites That Damage Foliage; Spider Mites, Dryberry Mite (Raspberry Leaf and Bud Mite), Redberry Mite, Raspberry Aphids, Leaf Rollers, Climbing Cutworms, Blackberry Psyllid, Western Winter Moth, Raspberry Sawflies and Leaf Miners  
Insects That Damage Canes; Rednecked Cane Borer, Raspberry Cane Maggot, Raspberry Cane Midge, Raspberry Cane Borer, Tree Crickets, Rose Scale, Stalk Borer  
Insect Contaminants of Mechanically Harvested Fruit; Part 3: Disorders Caused by Abiotic Factors  
Nutritional Disorders; Herbicide Injury; Preemergent Herbicides; Postemergent Herbicides; Translocatable Herbicides, Contact Herbicides, Volatile Herbicides; Correcting Herbicide Excesses; Environmental Stress; Temperature, Wind, Soil Moisture, Light, Solar Injury  
Part 4: Effects of Cultural Practice on Disease  
Using Disease- and Insect-Resistant Cultivars  
Excluding and Reducing Pathogen Populations; Modifying Microclimate Within the Planting; Altering Production Practices to Prevent Plant Injury and Infections  
Part 5: Development of Healthy Planting Material  
Raspberry Certification Programs in North America; The Raspberry Certification Program in the United Kingdom; Nursery Production of Virus-Free Planting Material; International Exchange Regulations for Rubus Plant Material  
Glossary; Index; Color Plates
