

ADDRESS BOOK CONTACTS, A Kindle Book Utility

An Address Book speaks for itself. This is a Kindle book and all data entered is done the Kindle way. We suggest that you use the Kindle for PC or Mac app to input your data with your fast keyboard. Once done, it will automatically transfer to the same book on your Kindle if your WiFi is turned on. You still can enter data with your Kindle and make edits or even create new records and it will sync with your desktop. Either way you only enter data once and can have it displayed on up to six different electronic devices with the Kindle apps. The display of the static pages while you enter your data will assist you in entering the information required for a full record. Download the sample and see how you like it. Use of entering tags separated by spaces will help in a search for perhaps all persons with tennis or all persons with poker, etc. You may even wish to enter Xmas to make sure that all such persons receive a Christmas card. All words in your records may be searched. We suggest that you enter all data for the record under one note, utilizing the records unique identifier number. There are numerous benefits in creating a utility book for the Kindle. One gets to use all the features that the Kindle has to offer in the design of the book, which are familiar to all Kindle users; and whenever the Kindle has a software update, the new features are automatically passed on to the Kindle created book. One wonderful advantage for users, however, is the ability to sync automatically single input across all registered devices if WiFi is turned on. Please see Cynthia Marrs author page for forum notes and postings, as well as information on her other books. You are invited to participate.
