

Pattern Recognition And Image Analysis: Selected Papers From The Ivth Spanish Symposium (Series in Machine Perception and Artificial Intelligence, V)

This volume contains 18 papers of high quality, selected to represent the work that is being developed by Spanish research groups in pattern recognition and image analysis. It is partly the result of the efforts of the Spanish Association for Pattern Recognition and Image Analysis (Aerfai). It is hoped that this volume will increase awareness of Spanish work in the international scientific community and initiate contacts with research groups worldwide.
