

CCIE Security v3.0 Configuration Practice Labs (Practical Studies)

CCIE Security v3.0 Configuration Practice Labs presents you with two full lab scenarios in exam style format to echo the actual eight hour CCIE Security lab exam. This publication gives you the opportunity to put into practice your own extensive theoretical knowledge of the broad range of topics covered on the CCIE Security lab exam to see how they interact with each other on a larger, more complex scale. An Ask the Proctor section list of questions for each section helps provide clarity and maintain direction, answering the most common questions candidates ask proctors in the actual exam. After each lab, this eBook lets you compare configurations and routing tables with the required answers. You can also run through a lab de-brief, view configurations, and cut and paste configs into your own lab equipment for testing and verification. The point scoring for each question lets you know if you passed or failed each lab. Developed by the CCIE Security program manager, these comprehensive practice labs that sell for hundreds of dollars elsewhere help make sure you are fully prepared for the grueling CCIE Security lab exam experience.
