

## CCNA Routing and Switching Virtual Lab

Get vital hands-on practice for the new CCNA Routing and Switching exams with this software package. CCNA Routing and Switching certification candidates need hands-on practice with routers and switches. This bestselling software, updated for the latest CCNA exams, allows you to create a virtual network environment where you can gain the proficiency needed for the Composite 200-120 or the ICND1 (100-101) and ICND2 (200-101) exams. With more than 150 hands-on labs that reinforce critical skills, it can be used in conjunction with Todd Lammles updated CCNA Routing and Switching Study Guide. Practice scenarios are mapped to the exam objectives and can be graded with the Net Assessment tool. Enables you to set up a virtual network environment in order to gain the hands-on proficiency required for the CCNA Routing and Switching exams. Includes more than 150 labs that are mapped to exam objectives and can be used in conjunction with Todd Lammles CCNA Routing and Switching Study Guide (ISBN: 978-1118749616). Uses the latest drag-and-drop technology to enable you to create a simulated lab with an unlimited number of routers and switches. Includes Net Packet Monitor, which shows the path a packet takes through a network in real time. Provides instructors a Net Assessment tool to determine a student's ability to assess and fix a broken network. CCNA Routing and Switching Virtual Lab, Titanium Edition 4.0 provides a software solution to your need for hands-on experience.
