

Brainstrains: Great Color Optical Illusions

Puzzles in living color-and with a trickster personality out to confound your eyes. A vivid array of optical illusions will have you doing double-takes as they seem to deceive perspective, shift shade, change pattern, and make visual magic. Think you know what's in a picture? Blink and check closely once again, and it's become something else! See that portrait of a young girl? Take another look-it shows her grandmother, too! Can you find both of them? Carefully examine a real postage stamp of Daniel Webster: when you turn it upside down, you'll notice something unexpected...Plus: figure out the secret in the landscape, step into a third dimension through colors fantastic effects, and more. Even before you reach the very last image you'll know that what you see isn't necessarily what you get!
