

## Depositions in a Nutshell

This new Nutshell, which replaces Binder, Moore and Bergmans Deposition Questioning Strategies and Techniques (2001), provides comprehensive descriptions and concrete illustrations of effective strategies and techniques for taking and defending depositions. The book can serve as a text for a 2-4 unit stand-alone depositions course (either live client or simulated) or as a supplement to a civil pre-trial lawyering course. It devotes separate chapters to such fundamental skills as obtaining helpful answers to critical questions, undercutting harmful testimony, obtaining a deponents version of significant events, and obtaining information from evasive deponents. Other chapters include topics such as responding to inconsistent or implausible testimony, overcoming opposing counsels objections and obstructionist tactics, and preparing a client to be deposed. The book will be accompanied by a teachers manual that describes how instructors might organize a depositions course, provides numerous classroom assignments and exercises and includes simulated case files.
