

# Autodesk Inventor 2008 Accelerated Productivity: Assemblies and Advanced Concepts

Autodesk Inventor 2008 Certified. Learn how to productively work in the Assembly Environment. You'll also learn how to perform advanced operations like creating iPart and iAssembly Factories. Create Derived Parts, iFeatures, Flexible Assemblies, Adaptive Assemblies, and much more. Assemblies and Advanced Concepts is designed for anyone who wants to quickly learn how to create and animate complex assemblies. Step by Step instruction is presented in short, fully animated movies that show and tell you how to perform all the advanced assembly modeling commands. It also takes your skill level beyond any other publication about Autodesk Inventor 2008. You will learn advanced techniques that will allow you to create fully compressible springs, and animate multiple springs in a complex assembly. You will also learn how to customize your animations using Inventor Studio. This course has over 9 and 1/2 hours of instruction broken down into short movies you can watch on your computer. All you need is a Windows based computer with speakers, and the course does the rest.
