

The tvOS Apprentice: Beginning tvOS Development with Swift 2

Learn How to Make tvOS Apps! The tvOS Apprentice teaches you everything you need to know to develop great apps for the Apple TV. Learn how to make tvOS apps in two different ways: via the traditional method using UIKit, and via the new Client-Server method using TVML. Who This Book Is For: This book is for any developer interested in Apple TV app development. Regardless of your experience level, this book is for you! However, the book does assume at least a rudimentary knowledge of Swift. Topics Covered in The tvOS Apprentice Architecture: There are two different ways to make apps for the Apple TV - learn which is best for you. TVML: Learn how to use TVML templates to implement beautiful interfaces for the Apple TV. TVJS: Learn how to use Javascript to manipulate the TVML DOM. Traditional Apps: Learn how to make make traditional app using native libraries. Focus: Apple TV uses a whole new Focus paradigm to show the user what control is currently selected - learn how this works and what it means for your apps. Animation: Get ready to add some delightful animation to your tvOS apps! Networking: Learn how to download content, video, and other assets over the network. User Input and the Controller: Learn how your app can interact with the new Apple TV remote. Video Playback: One of the most common requirements for Apple TV apps will be to play video - learn how to do that here! On Demand Resources: Learn how to use Apples easy to use storage system, so your app can download assets on the fly. CloudKit: Learn how to use CloudKit on tvOS to store your apps data. In App Purchases: Monetize your app by allowing users to purchase digital goods. Harnessing the Server: Explore a real-world example with industry standard server technologies. Native UI in TVML Apps: Learn how to augment the TVML-to-UIKit engine to

create custom resources, TVML tags, and styling properties. tvOS Design: Learn how to design your apps to fit in well with the tvOS ecosystem. Creating Layered Images: Shows how to create a new kind of image specifically for the TV. The Top Shelf: The Top Shelf is a new design concept that allows your app to show off specific content - learn how to use this in your apps. And Much More: Javascript Crash Course, Server Deployment, Collection Views, Stack Views, and more!
