

Developing in 60 Minutes: Linux and Python

Quickly get started developing in a Linux Environment! This book is for developers that would like to become familiar programming with Python in the Linux environment. Expert advice and helpful instructions are designed to get you started using new skills in as little as 60 minutes! The author, Jedidiah Reeser, guides you through the early steps and decisions in setting up your Linux environment. Installation options, virtual machines, text editors and other tools are discussed. The book includes a tutorial for setting up a virtual machine and also a Python tutorial to help you practice your skills! This material is designed to be read and the tutorial completed within 60 minutes, but some readers may choose to go faster or slower depending on their knowledge and experience.
