

## FileMaker Pro 5 for Windows & Macintosh (Visual QuickStart Guide)

FileMaker Pro 5 for Windows and Macintosh: Visual QuickStart Guide has been completely updated to cover features and functions new to FileMaker 5, including the ground-breaking Instant Web Publishing capabilities that allow users to automatically render database layouts on their intranet, and a totally new interface that complements the look and feel of Microsoft Office. Its as useful to beginners, who require a tutorial approach to help them get up to speed, as it is to more intermediate users, who want a reference guide for looking up what they need to know when they need to know it. FileMaker Pro 5 offers the easiest way for Mac and Windows users to create, share, and manage information and projects with colleagues across the hall or over the intranet or on the Web. This powerful, flexible tool is ideal for everything from transforming Microsoft Excel spreadsheets into databases in just seconds to operating a retail business on the Web using built-in CGI tools.
