~~*~*~*Excerpt:Idbeen warned the doctor was a bit eccentric. That he dabbled in machinery and had been ostracized byothers in his profession for the lengths he went to please his patients. Youllnever find another employer, I was told. Not once they see your onlyreference is Doctor Mullaley. Themad Irishman. The charlatan who promised cures to bored housewives and whose waiting room hadnt been empty since Id arrived for my first days work. If I hadnt already been turned away at every other respectable physicianspractice, I might have heeded the advice. However, those warnings only servedto stir my interest. Iwas intensely curious about the nature of the doctors cures. Even more soabout the conditions he treated, but they were only spoken of in whispers andnever in the presence of an unmarried woman. Which made me wonder why hedhired me. Not that I was going to complain. One glance at his tall rangy frame,frosty blue eyes and dark, slicked-back hair, and my misgivings evaporated.However,my curiosity about the man and his practice wasnt to be satisfied at thatmoment, because the doctor waved me toward the reception desk where I worked atfitting in patients who arrived without an appointment. A task I found akin tocinching in the waist of a corset. There was only so much ribbon one could pullbefore something gave.Thatsomething was the inimitable Mrs. Davies. She arrived in a dudgeon. Cheeksflushed, eyes a little wild. The afternoon was very balmy, and the painstakingcurls at the sides of her cheeks had wilted and stretched toward her jaw likeearthworms. I couldnt

help staring while she tapped the counter with a sturdy finger, insisting her needs were of the highest import. If she didn't receive a treatment that afternoon, somebody would hear about it. At its end, I gave her a false smile, said I'd find the doctor, and escaped down the corridor to the treatment rooms. The corridor was as handsomely appointed as the waiting room with rich oak paneling below the rail, and burgundy brocade above. But gaslight sconces were placed so far apart that shadows loomed between the doorways. I paused at the first room to listen, hoping to hear the low timbre of the doctor's voice. Faint moans came through the door, but since they didn't have an urgent edge, I hurried to the next and pressed my ear against the wood. Hands curved over my shoulders. Pardon me, Nurse Percy. The doctor firmly pushed me to the side and strode into the room. Glancing around his tall frame, I spotted Mrs. Headley who lay on a table that tilted with the lower half split in two. My jaw sagged as I noted that while she was clothed in a sack-like gown, Mrs. Headley lay bared from the waist down, her legs strapped to the split legs of a leather-padded tabletop. Her fingers dug into handles at the sides. Most curious, a long, slender trough ran from a tank latched to the ceiling, very like a toilet's reservoir. The trough emptied into a funnel, which ran into a tube. The tube passed through a device with turning wheels that clicked like a clock's inner gears, and then ended at a nozzle that spurted water in rhythmic pulses toward the juncture of Mrs. Headley's thighs. How odd, I thought.
