

Freelance Saga: Learning Curves

What would you do if you were given the chance to do something extraordinary? What if a world existed where life was a game? You could gain levels, fight monsters, and get into sexy situations. You could become a truly powerful person. Would you take up the call to explore this brave new frontier, or give up on the adventure of a lifetime? Scott Hunter made his choice, and life is about to get sexy. Freelance Saga: Learning Curves is the first episode in a series about a man who enters into a real-life fantasy world designed like a game. While it seemed perfectly normal, if highly advanced, at first, he soon learns that the world is a place filled with opportunities for developing both his strength and his perversity. Scott Hunter, freelance monster trainer, is a new beta-tester for Alterra International. The relatively unknown corporation shares their secret, the ability to travel to a world where life is literally a game! Treating that reality like a virtual existence, Scott enters but soon discovers that things are far more real than he expected. This story is slightly related to the story series known as Origin A.R.S. The connection is a minor thing, but it is part of a related concept that will include several different world settings with a similarly named main character. Consider these stories to be alternative universe settings with a similar main lead. They are a collection of What if stories with a main character that has a lot in common with the other similarly named main characters, but each is their own existence with their own unique back story. Each story will also have their own litrpg style of telling, but the game concept is different in each one.
