

Functional Programming, Glasgow 1995: Proceedings of the 1995 Glasgow Workshop on Functional Programming, Ullapool, Scotland, 10-12 July 1995 (electronic Workshops in Computing)

The Glasgow Functional Programming Group is the largest research centre of its kind in the UK, and its work has attained international recognition. Since 1988 the group has organised annual workshops which provide a focus for new research, and encourage interaction with other functional language researchers in both industry and academia. The eighth workshop in the series was held in Ullapool, Scotland, from 10 - 12 July 1995. The papers, which have been thoroughly revised and updated for publication, cover new research results in a wide range of topics, including formal reasoning about functional programs, graphic user interfaces, and concurrency. Together they provide a comprehensive overview of recent research in this area, which will be of interest to researchers, postgraduate students and practitioners. The full papers from the Functional Programming Workshop are available on-line at: <http://www.springer.co.uk/eWiC/Workshops/Functional95.html> This booklet provides the passwords needed to access the web site. Purchasing the booklet provides the user with unlimited access to the site for four years (subject, of course, to entry of the correct passwords each time).
