

Laserjet Companion

This complete reference shows LaserJet users how to get professional printing results - no matter what LaserJet model they own or what level of computer experience they have. Hard-to-find printing information is easily accessible in this book. This edition has been completely updated to feature the latest Jet II and III series machines and the newest software, font cartridges and utilities. The authors address programming possibilities with all levels of PCL (Printer Command Language) and Postscript. A special section covers printing from Windows as well as from the most popular software packages.
