

Inside Microsoft SharePoint 2013 (Developer Reference)

Build custom SharePoint solutions with architectural insights from the experts. Take a deep dive into SharePoint 2013, and master the intricacies for designing and implementing robust apps and other business solutions for your organization. Led by an author team with in-depth knowledge of SharePoint architecture, you'll thoroughly explore the SharePoint 2013 development platform and new app model through hands-on tasks and extensive code samples. Discover how to:

- Create SharePoint-hosted, provider-hosted, and autohosted apps
- Master the new app security model with OAuth and Certificates
- Develop workflows with the SharePoint 2013 workflow model
- Design a custom search experience and create search-based apps
- Leverage the client-side object model and REST APIs
- Produce catalog-driven web sites with Web Content Management capabilities
- Get cloud-based data sources with Business Connectivity Services
- Create and utilize remote event receivers for lists and libraries
- Generate new social networking apps and solutions
