

Media Law and Practice

This book is a reference guide for practitioners to the major legal and regulatory issues in the field, but could also be used as a media law textbook for a course of academic study. Each chapter is written by an expert in the field. Throughout the book, the authors cover the relevant aspects of law governing the media in its many forms, with an emphasis on the practical operation of the law in this sector. It not only discusses the theoretical basis of legal concepts such as defamation, but also analyzes the application of the law in the high paced environment of daily newspapers, the changing reality of what constitutes broadcasting, including the regulation of distribution channels, and the regulation of material distributed via those channels, and examines the implications for defamation law of the online, borderless world. Amongst other things, the book also covers intellectual property issues in the media, with a specific emphasis on copyright works, trade marks and the exploitation of intellectual property via licensing. The work primarily discusses the identified themes in the context of UK and EU laws.
