

Life in the Mouse House: Memoir of a Disney Story Artist

A SEARING, SCATHING DISNEY MEMOIR From 1935-1950, story artist Homer Brightman worked on the biggest Disney projects: Snow White and the Seven Dwarfs, Cinderella, the Oscar-winning short film Lend a Paw, and many others. A dream come true? Not really. Brightman's life in the Mouse House during Disney's Golden Age of Animation was tarnished by self-serving, power-hungry animators; by draconian policies and broken promises; and by Walt Disney himself. Will the Real Walt Disney Please Stand Up? Homer Brightman first encountered Walt Disney in the mens room of the Disney Studio in 1935. Another employee had just complained about Walt, not knowing that Walt himself was standing at the next urinal, and by lunchtime that employee found himself on the street, and out of a job. Over the next fifteen years, Brightman experienced the highs and lows of working for a driven, complex, sometimes ruthless businessman and creative genius, Walt Disney, a man that other Disney artists but not Brightman saw as a smiling uncle or as a caring, patient mentor. Brightman presents the good and the bad, as he experienced them firsthand, and lets you ponder the contradictions of Walt's character. Fun and Games and Politics in the Mouse House When the Disney animators were creating classic films, they were pulling pranks—sometimes mean-spirited pranks—on one another. Brightman recounts how he and Harry Reeves once vandalized Roy Williams (who later became the Big Mooseketeer on The Mickey Mouse Club) black limousine, and how Williams got back at Reeves that night by flattening the tires of his car. The prank includes improbable appearances by H.G. Wells and Charlie Chaplin, who dropped by Brightman's office on a tour of the studio with Walt right after Williams, in anger, had smashed the glass panel of the office

door. When not pranking, the animators were politicking: Brightman goes into detail about the toxic political culture at the Disney Studio, where animators would jump to their feet and hide their work whenever another animator came around, steal credit for one another's ideas, and compete often shamelessly for the fickle favor of Walt Disney. The politics reach their crescendo in Brightman's nailbiting account of the Disney Studio Strike of 1941, and how Walt retaliated against those he felt had betrayed him. In *Life in the Mouse House*, you'll read about Brightman's penniless start at the Disney Studio on a cold day in 1935, what really caused the Disney Studio Strike in 1941, how Walt lost his cool, and the sad aftermath. The foibles and eccentricities of many well-known Disney artists, animators, and executives: Walt's ill-fated Field Day, his trip to Mexico, and his uncanny talent for physical storytelling. What Brightman did after he left Disney in 1950, despite Walt telling him he'd never work in the business again. Homer Brightman wrote *Life in the Mouse House* in the 1980s. He died in 1988, and the book has been lost since its rediscovery last year. When Brightman wrote the book, most of the people in it were still alive. He didn't want to offend them with his unflinchingly honest, provocative narrative, and so he changed the names of such luminaries as Ken Anderson, Perce Pearce, Ted Sears, Harry Tytle, and Roy Williams. Nearly thirty years after Brightman's death, and the deaths of virtually everyone he worked with at Disney, we can now reveal the identities of characters like Muggle (Ken Anderson), Snojob (Perce Pearce), Crock (Card Walker), and over three dozen others. You'll read about these beloved Disney legends including Walt Disney himself as you've never read about them before. Come share Homer Brightman's life in the Mouse House!
