

The Living Will Guidebook: A Lay Persons Guide to Living Wills and the Right to Die/Right to Live

The decision to make a Living Will is a decision that I encourage everyone to consider. Many people say that if their life was being prolonged solely by artificial means that they would wish to die naturally and with dignity. Yet most people do not execute a Living Will, either in fear of discussing their own mortality or because they believe they can not accomplish the task on their own. I encourage everyone to carefully and thoughtfully address this issue, and, if it is their wish to avoid prolonging their life in a terminal situation, to use this book to prepare a Living Will. Purchasers will also be entitled to receive one state approved Living Will form upon written e-mail request to the author. Instruction are included in the Book
