

Microprocessor & Assembly Language Programming

Microprocessor Architecture : Basic computer architecture using 8085 MP I/O, Memory & system buses, Instruction execution sequence & data flow, Instruction cycle concept of address, Bus, Data bus data & Control bus. Synchronous & Asynchronous buses. I/O Memory Interface : Programmable, Interrupted initiated, DMA transfer serial and parallel interface, Detail study of 8251 I/O processor. Instruction Set & Assembly Languages Programming : Introduction, Instruction & data formats, Addressing modes, Status flags, All 8085 instructions, Data transfer groups, Arithmetic group, Logical group, Branch group. Microprocessor Development System (MDS) : PROM programming, Emulator, ROM simulation introduction to up kits, Study of 8051, C single chip microcomputer. Case Structure & Microprocessor Application : Up application interfacing a matrix keyboard 7-segment led display. Study of traffic light system stepper motor interface. Basic Architect : Introduction to 8086, Motorola 68000.
