

Special Edition Using Microsoft FrontPage 2002

This book covers everything needed to develop and publish professional Web and intranet pages and sites using FrontPage 2002. It provides comprehensive sections on Web server setup and administration and on adding interactivity to Web sites with Active Server Pages and scripting languages such as JavaScript and Visual Basic Script. It also tells more advanced readers how to integrate Web sites with databases as well as add Dynamic HTML, XML, and Java applets to their sites.
