

# No-Regrets Remodeling: How to Create a Comfortable, Healthy Home That Saves Energy, 2nd Edition

The second edition of No-Regrets Remodeling will educate homeowners about opportunities for improving their homes energy efficiency and comfort at one of the most critical junctures in home ownership. That moment comes when homeowners are faced with the decision to remodel a recently purchased or existing home, or due to a component failure, need to upgrade their homes HVAC, appliances, lighting, or other energy-related systems. Not a technical guide for the pro or serious hands-on DIYer, the book is oriented to the homeowner who wants to make the right decisions to improve their homes comfort, safety, durability, and energy savings, but isnt prepared to do more than simple weatherizing or efficiency measures. No-Regrets Remodeling, Second Edition is valuable as a consumer-education tool for builders, remodelers, and home-performance retrofitters. But most importantly, it will educate homeowners on how to choose the right professional for the job. No-Regrets Remodeling, Second Edition introduces homeowners to the concepts of whole-home performance, energy auditing, energy rating, and how HVAC systems and other elements of a home work together. No-Regrets Remodeling, Second Edition will help homeowners understand and control energy use in their homes, pointing out money-saving opportunities they can take advantage of now, as well as helping them plan for future upgrades when they can afford them.
