

Environmental Monitoring: A Comprehensive Handbook, Protocol CD

Environmental monitoring programs are appropriate for manufacturing of sterile products and non-sterile products. The most stringent application of these procedures is for sterile products manufactured by aseptic processing, while less stringent procedures may be appropriately employed for terminally sterilized products, and even less stringent procedures for non-sterile products. Environmental Monitoring: A Comprehensive Handbook, written by authors with extensive experience in environmental monitoring and should provide practical guidance on how to establish and maintain a system that will be meaningful, manageable and defensible. CD containing 11 protocols ready for use at your facility. Protocol CD contents: Validation of HVAC Systems, Monitoring of Utilities: Compressed Gases, Validation of Water Systems, Cleaning/Sanitization Qualification, Performance Qualification of an Environmental Monitoring Program, Media Fills/Process Simulations, Environmental Monitoring and Control System Assessments, and Typical Procedures Required for an Environmental Control Program
