

## The Eclipse of the Blood Moon

When the blood moon coincides with Halloween, the forces of darkness unite to wreak their evil spells. Will this All Hallows Eve bring joy or sorrow? Curses abound and destiny calls, as a vampire watches over his human. Devils atone to the moon, and shifters hunt their mate on land protected by a powerful white witch. An angel takes human shape to protect the gypsy girl he loves, and a black widow hunts her prey in human form. In these five chilling and sexy tales, is love enough to break the cycle? Or is all lost under the orange glow of the menacing sphere in the sky?
