

101 Golden Rules for Game Designers: How to Create Amazing Characters

Vincent Zhao, author of the highly successful Fantasy+ series, has penned another useful guide that will provide young designers with essential working rules for basic game design. The first volume of 101 Golden Rules for Game Designers will help aspiring designers clear away the mystery shrouding CG character creation. Topics covered include initial preparation, materials, inspiration, technique, and color and composition, as well as dynamic character design for a key moment or action scene and making the move from traditional technology to digital technology. The author passes on wisdom from industry leaders and transforms difficult theories into practical rules for character design, which will help students and beginners in the gaming industry enhance their skills in developing creative concepts and painting techniques. The hope is that they progress and become competent character and CG designers in the ever-growing field of game design.
