

Soulflame I: The Spark (Historic Lesbian Erotic Romance)

In 1660 King Charles II of England returned to the throne and brought with him among other things, the chance for women to be considered actors. In light of this development, two women living under the same small business muse on joining the stage. What begins as idle talk becomes an extravagant show of such a performance, ends in a stolen kiss. Done in innocence and jest, it leaves the spark of something more within them both that will only grow. Before the day is done, Alice will swallow her pride and embrace those kindling emotions, changing everything between them. * Contains sensitive content intended for an audience of 18 and over only.
