

# Solaris 8 System Administration Bundle, 3 Volume Set

This bundled set is for anyone responsible for administering one or more systems running the Solaris 8 release. It covers a broad range of Solaris system administration topics such as managing user accounts and groups; managing server and client support; shutting down and booting a system; managing removable media; managing software (packages and patches); managing disks and devices; managing filesystems, and backing up and restoring data. Topics are described for both SPARC and IA based systems where appropriate.
