

The Gate

Devlin Bear was working on a top secret government project when he was killed in an explosion in the facility where he worked before Carly chose his Sim as her sexual partner and fell in love with a man completely beyond her reach. But if he really died in that explosion, how is it that her new companion Cyborg seems to think hes the real Devlin Bear? Is it the AI and programming? Or is he the real deal? Carly wants to believe he is Devlin Bear, but its hard to believe thats possible--hard for her to believe. Some people arent having nearly as much trouble believing and they want the secret trapped in Devlins mind. Author Kaitlyn OConnor was first published by Harlequin Enterprises in 1994 under the pen name of Madris Dupree after nearly a decade of apprenticeship --struggling to learn the business, the marketing, and the writing skills necessary for a career in commercial fiction. That first published book, a historical, (which was actually her fourth attempt at a marketable piece of fiction) was successful, however, selling nearly 80,000 copies in the U.S., Switzerland, France, and the U.K. She writes various genres (or sub-genres since she always writes romance!) under different pen names. She has written science fiction/futuristic/fantasy under several Kaitlyn OConnor, in honor of her Scottish grandmother, Lyssa Hart, and Angelique Anjou (for the French ancestry), all combined here now under the single pen name Kaitlyn OConnor.
