

## Rape Hysteria: Lying With Rape Statistics (Female Sex Predators)

Review Feminists HATE this book. -  
Library Journal The incidence of rape in the U.S., and across the world, has markedly decreased in the past twenty years. However, the mainstream media, and politicians, are convincing the public that there is an epidemic of rape and that we are immersed in a rape culture. This courageous report pierces through the fallacies and fraudulent rape statistics that are favored by those stirring up rape hysteria in the public arena. With citations to dispositive and scholarly research, Mr. Davis has definitively shown that the real rate of false rape accusations in the U.S. are about 60%, and, that most of the claims of a rape culture in the U.S. are mere propaganda and hysteria. This monograph is a well-researched and concise briefing for all professionals (including journalists) seeking a quick overview of the problem of falsified rape statistics in modern day government media events, and, the mainstream media. It is ideal for journalists, judges, researchers, lawyers and law enforcement personnel to gain a perfunctory understanding of the recent phenomenon of Rape Hysteria in modern culture. Written by a prosecutor with over 35 years of trial experience, this short work provides the studies, and, the information, on which readers can gain an accurate and healthy understanding of how to avoid being manipulated by gynocentric propaganda and the phenomenon of rape hysteria in our culture. The text and footnotes contain many hyperlinks to contemporary sources for documentation.
