

The Music of Your Heart: Freedom to live the life of your dreams through Network Marketing

In this book, I'll share some tools that have been indispensable in creating my own financial and lifestyle freedom through network marketing. Whether you are just getting started or have been running your business for years, doing it part or full time, this book will help you enjoy some lifestyle freedom right now regardless of your current financial circumstances. Many people entering our profession today have never been their own boss. Starting your own business can feel intimidating and overwhelming. The tools provided in this book are designed to help you live a balanced, fulfilling, and productive life as you work toward achieving your goals. This book contains four sections. The first section helps you dig deep and get clear about your intentions and your bigger why for being in business. This will keep you motivated to continue, no matter what challenges you encounter. The second section helps you identify where your personal and work life is off balance by looking at nine distinct areas of your life. Striking a balance is critical to success in both your work and personal life. The third section will help you work more productively. You'll find tools to help you clarify priorities and then plan and manage how you invest your time and resources--tools that many other CEOs have used to help them run multimillion dollar companies. The fourth section provides a review of the suggested Freedom Challenges-- exercises provided at the end of each chapter, that are designed to help you clarify, create, and support your path to freedom so you can be successful in building your network marketing business, live the life of your dreams, and help others do the same.
