

## VALK (VALK Trilogy Book 1)

Love drove Jeri King to join NEUROPOL after her best friend Therron disappeared into its shadowy underworld. As a Valk agent, she's trained to fight and fuck with the best, but Therron treats her like another one of NEUROPOL's deadly whores. When a code able to fry the bio-engineered DNA of Therron and every other Berserker agent is discovered, Jeri has one last chance to convince him to trust her again. His life and their future hang in the balance. \*\*\*\*\* This 39,000+ novella is for readers who love dystopian science fiction with a happy ending and hot, explicit sex with a next-gen bad boy that will soak your panties. \*\*\*\*\* With a low growl that hit Therron directly in his crotch, Jeri ripped her jacket open and let it slide down her arms. Beneath it was nothing more than a black lace bra. His first instinct was to unhook it, freeing the small breasts for his hands and mouth. Instead, he pressed a fingertip against her spine, mesmerized by the way her shoulders instantly flared back and her tight, muscular ass thrust towards him. Unhook it. The words came out strangled, the sight of her like a vise around his vocal chords. Her hands shook as she fumbled with the bras hooks and he wondered if the shake was real or a ruse to get him to touch the fabric. Every last thing on her was standard agency issue for a Valk -- which meant each item was likely deadly in its own unique way. The jacket, boots, pants, knives, gun -- weapons within weapons until she was a walking minefield. He had no way of knowing if those trembling fingers were a set-up. Not that there was much left of his mind to care. All he wanted to do was pull those leather pants down and sink into her, hear her moaning his name as his hands explored the hard planes and soft curves of her body. Faster, Jeri. Your boys won't hold perimeter much longer. They'll hold. She toed her right boot off, the one with the gun, then reached

down and carefully removed the left one. The chem light glowed just bright enough for him to see the spring on the left heel. She could have gassed him already, sending both of them into la-la-land until the tactical team woke them up. Right. Theyll hold because youre the boss and thats what you want. She nodded. God, how he wished it were true. Not that theyd hold -- he had no expectation of that -- but that she wanted them to, that she really was stripping away every layer of deceit all-father had dressed her in. The pants and boot socks were off a second later, leaving only her underwear. She moved to push them down but he stayed her with a different command, his gaze never leaving the dark outline of lace against her pale flesh tinted blue by the light. Wires. Jeri reached up to the simple metal stud in her ear and started to slowly pull on it. A disjointed shiver ran over her body as the embedded length of carbon wire left the flesh of her ear lobe. There was almost two feet of wire, strong and micro thin. Hed once seen Lacy, the Valk assigned to his brother, decapitate a man with the same kind of string. For all he knew, Lacy had taken Tanks head the same way. What else? The question was wet with the memory of other mens blood and Therron shook his head to dislodge the image from his mind. She threw a wristwatch to the floor, and then she placed both hands on the sides of her underwear before answering, Just these. Just a little slip of fabric, easy to push to the side, to slip his fingers beneath and explore the moist entrance to her cunt. He grabbed the chem light with his free hand and moved it closer to her body. Slowly, he ordered. Therron kept the light close to her, his other hand sliding down from the hard grip on her head to rest lightly against the back of her neck. He could feel her pulse, slow and heavy now, against his fingertips. The beat matched the throb in his cock as she pushed the panties over the curve of her ass. Jeri hesitated. Hi
