

Shades of Green (Highland Bears Book 5)

Thal has never realized how boring her life as a nymph is until a group of ogres kidnap her and her kin. When she manages to help her friends and family escape captivity, she never expects to run into two men and three leprechauns intending to save them, as well. When Kiran and Gaige mount a rescue with three unlikely partners, they couldn't be more surprised to realize that one of the tiny nymphs is their mate. Has Mother Nature played a nasty joke on them, or is there more to the tiny lass than what they see?
